ABSTRACTED-PUB-NO: JP2000137603A

BASIC-ABSTRACT:

NOVELTY - The generation order of software component is determined based on information which designates the other software component. The execution order of conversion procedure is stipulated based on generation order. Based on execution order, each conversion procedure unifies these software components.

DETAILED DESCRIPTION - The generation order of software component is determined based on information which designates the other software components

which
utilizes each of these software components. The conversion procedure
to
executable program of element file is stipulated based on information
of
element file and other file utilized in element file. INDEPENDENT
CLAIMS are
also included for the following:

- (a) software component integrator;
- (b) generation apparatus of software component integrator

USE - Software component integrator.

ADVANTAGE - As conversion procedures are performed based on
generation order,
the exact integration is performed in short time, thus increasing the
efficiency of software development.

DESCRIPTION OF DRAWING(S) - The figure shows the functional block
diagram of
software component integrator.
